90% Trimmings	Increasing	Short	Lower
90% Imported Beef (frz)	Increasing	Short	Lower
95% Imported Beef (frz)	Increasing	Short	Lower

Last week, the average USDA Choice boxed-beef cutout lost 1.2% from the prior week, but it was 7.7% higher than a year ago. Beef production declined 0.7% from the prior week and was 5.6% smaller than a year ago. Spot live cattle prices are currently 8.1% higher (y/y). Per the USDA, on Feb. 28 cold storage boneless beef stocks were 5.1% smaller (y/y), declined during the month by 6.6%, but are only 5.4% below 2022's record monthly high. It's pretty much understood within the beef industry that with a tightening cattle outlook, higher (and/or record-high) beef prices will materialize as this year progresses, but the unknown factor is how much consumer demand will back off. It's likely with still high (and broad) inflation that beef demand may collapse.

Market Report provided by: American Restaurant Association | www.americanrestaurantassociation.com PO Box 51482, Sarasota, FL 34232 \cdot 941-379-2228

Last week, CME nearby class III milk futures added 4.0% (w/w) but were 25.4% lower than a year ago. CME cheese block prices increased 5.2%, and cheese barrel prices gained 4.2% (w/w). CME spot butter prices lost 0.4% (w/w) and were 14.9% lower (y/y). Per the USDA, on Feb. 28, domestic cold storage cheese inventories were 1.4% smaller (y/y), were unchanged (m/m), but still historically high as February 2022 was a record large. At the end of February, American cheese stocks fell by 1.7% (y/y) and declined by 0.8% (m/m). On Feb. 28, U.S. frozen butter inventories were up 12.2% (y/y) and increased by 11.6% during the month. Big-time late-winter weather has hit pretty much all of California, which could be slowing down milk and butter (cream) production and bringing support to prices.

Market Report provided by: American Restaurant Association | www.americanrestaurantassociation.com PO Box 51482, Sarasota, FL 34232 \cdot 941-379-2228

Last week, the USDA weekly national composite whole bird index added 1.4% (y/y). For the w/e March 18, the weekly number of chickens slaughtered was down 1.4% from the prior week but 0.4% larger than a year ago. The average bird weight was 0.5% heavier (y/y). Ready-to-cook chicken production for the w/e March 18 was 0.2% larger (w/w) and up 0.9% (y/y). 2023 ready-tocook chicken production is pacing 1.4% stronger than in 2022, which is less of an increase than the USDA's Q1 2023 forecasted production gain of 2.1% (y/y). The large shell egg market (national average) was up 12.4 (w/w) and is 106.5% higher than a year ago. The USDA turkey breast (BS) price lost 4.8% (w/w) and is down 30.1% (y/y). Per the USDA, on Feb. 28, total domestic cold storage chicken stocks were 9.9% larger (y/y) but declined by 0.4% (m/m). Cold storage chicken breast and breast meat supplies were up 40.7% (y/y).

Market Report provided by: American Restaurant Association | www.americanrestaurantassociation.com PO Box 51482, Sarasota, FL 34232 · 941-379-2228 Most of the major grain markets, barring corn, were lower last week, including soybean oil prices down a whopping 7.3% (w/w) despite Friday's resurgence based mainly on a Reuters piece claiming Russia is considering curbing/halting the country's wheat and sunflower exports. The article claims the reasoning behind the move would be to build up state grain reserves in the face of tanking grain (especially wheat) prices within Russia and internationally.

Produce had a mostly down week with the various lettuce, tomato, and onion types all lower at least slightly (w/w). Lettuce prices should flatten out soon as they usually bottom near early April and remain there through May. Tomato prices on the other hand will likely continue to fall until mid to late April before starting their usual climb lasting throughout the second half of the year. Twenty-five-pound large tomato prices were down almost 8.0% (w/w) in the latest data and are now down over 20.0% (m/m). Yellow onion prices will likely continue to weaken as well until late April or mid-May before seasonally climbing to their usual calendar year high in July. Avocado prices were down around 3.0% (w/w) but don't anticipate that as the start of a reversal.

Tuna Yellowfin, frsh	Steady	Short	Lower
Salmon Atlantic Filet, frsh	Steady	Short	Lower
Pollock Filet, Alaska, frz	Steady	Available	Higher

Market Report provided by: American Restaurant Association | www.americanrestaurantassociation.com PO Box 51482, Sarasota, FL 34232 · 941-379-2228 Two of the most predictable seafood items out of the nine we monitor have been fresh Atlantic salmon filet and frozen Alaskan pollock, as both have stuck pretty closely to usual seasonality over the past year. They're both still at least slightly inflated over their normal pricing, but their (m/m) movements have been par for the course, despite the seafood markets as a whole acting rather bizarre last year. Atlantic salmon's import price is currently 12.0 percent higher vs. its March five-year average.

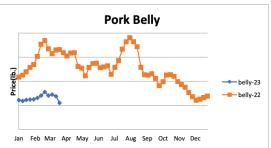

Product Description	Market Trend	Supplies	Price vs. Last Year
Live Hogs	Decreasing	Available	Lower

Market Report provided by: American Restaurant Association | www.americanrestaurantassociation.com PO Box 51482, Sarasota, FL 34232 · 941-379-2228

Last week, the weekly average USDA pork cutout lost 5.7% from the prior week and was 24.1% lower than a year ago. Pork production was down 1.3% from the prior week but 1.2% larger than a year ago. Year-to-date pork output is running 1.0% better than a year ago but is lagging behind the USDA's Q1 2023 production forecasted rise of 1.4% (y/y). Spot lean hog prices are down 23.7% (y/y). Per the USDA's February livestock slaughter report, February hog slaughter was 0.3% smaller (y/y), and with the average hog weight at 291/lbs., was down 0.7% (y/y). Total pork production for the month was down 0.3% (y/y). According to the USDA, on Feb. 28, total U.S. cold storage pork inventories were up 9.0% (y/y), grew by 0.4% (m/m), but were 31.6% below 2015's record monthly high. Other cold storage pork items stocks (y/y) on Feb. 28 were: pork bellies up 41.6%, ribs up 9.0%, trimmings down 5.3%, and hams were up 1.0% after being down 12.9% (y/y) in December. The recent weakness in wholesale pork prices is counter-seasonal, which hints at lagging demand, but like in beef, the next few weeks' price movement will tell us a lot.
